OF CORRECTION

APPROVED

LETTER REGARDING CERTIFICATE OF CORRECTION

SEP 20 2001
FOR THE DIRECTOR OF USPTO

Sir:

Enclosed is a Certificate of Correction which Patentees request be entered with respect to the above-referenced patent. The Certificate of Correction is submitted to correct various typographical errors, correct certain figure designations in the specification to be consistent with those in the drawings, correct the order of inventors listed on the first page of the patent in accordance with an amendment to the specification made in the Response to Advisory Action dated August 9, 1999, correct the residence of some inventors in accordance with the Declaration and Power of Attorney for Patent Application submitted to the Patent Office with the Response to Office Action dated July 3, 1998, and add claims omitted from the patent that

REVIEW

were presented in the Amendment Under 37 C.F.R. § 1.312(a) dated October 14, 1999, which Amendment was entered by the Examiner in a Response to Rule 312 Communication dated January 6, 2000.

Since the errors sought to be corrected by the Certificate of Correction were made by the Patent and Trademark Office, no fee should be required. If the Patent and Trademark Office believes a fee is required, or if there are any questions regarding the Certificate of Correction, please telephone Patentees' undersigned attorney at (408) 945-9912.

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to:
Assistant Commissioner for Patents, Washington,
D.C. 20231, on October 26, 2000.

10-26-00 David R. Graham
Date Signature

Respectfully submitted,

David R. Graham

PATENT NO. : 6,034,652
DATED : March 7, 2000
INVENTOR(S) : Freiburger et al.

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

Column 5, line 65, delete "5 to 5C" and substitute
--5A, 5B and 5C--;
Column 11, line 67, after "5B", insert --, 5C--;
Column 22, line 29, delete "Update Frequency" and
substitute --Update-Frequency--;
line 34, delete "bookreview-1-al.gif" and
substitute --bookreview-1-al.gif--;
Column 24, line 59, delete "5A and 5B" and substitute
--5A, 5B and 5C--;
Column 25, line 12, delete "5A and" and substitute
--5A, 5B and 5C--;
line 13, delete "5B";
Column 28, line 2, delete "5A and 5B", substitute
--5A, 5B and 5C--;
line 15, delete "5A and 5B", substitute
--5A, 5B and 5C--;
Column 29, line 11, after "5B", insert --, 5C--.
Column 34, add the following claims:

19. A system as in Claim 2, further comprising means for non-volatilely storing the set of content data.

20. A system as in Claim 2, further comprising:
means for indicating a time at which the means for selectively displaying is to begin display of the image or images; and
means for activating the means for acquiring at the indicated time, such that the means for selectively displaying displays the image or images in real time as the set of content data is acquired by the means for acquiring.

PAGE 3

PATENT NO. : 6,034,652
DATED : March 7, 2000
INVENTOR(S) : Freiburger et al.

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

21. A system as in Claim 2, wherein the means for selectively displaying further comprises means for scheduling the display of the image or images generated from a set of content data.

22. A system as in Claim 2, further comprising means for updating the set of content data.

23. A system as in Claim 22, wherein the means for updating operates without disrupting use of the apparatus by the user during the time that the means for updating is operating.

24. A system as in Claim 22, wherein the means for updating obtains the updated set of content data from the content providing system.

25. A system as in Claim 24, wherein the means for updating operates automatically, without intervention by the user.

26. A system as in Claim 24, wherein the means for updating further comprises:
means for specifying the location of the content providing system; and
means for specifying the time at which an updated set of content data is to be obtained from the content providing system.

PAGE 4

PATENT NO. : 6,034,652
DATED : March 7, 2000
INVENTOR(S) : Freiburger et al.

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

27. A system as in Claim 2, wherein the means for detecting further comprises a location in a memory that stores data representing the duration of time since a last user interaction with the apparatus, the memory location being predetermined according to a method for operating the apparatus, such that an idle period is detected when the stored duration of time is equal to the predetermined duration.

28. A system as in Claim 2, further comprising:
means for interrupting a process being implemented by the apparatus at the time that the means for selectively displaying begins operating;
means for storing information representing the state of the process at the time of interruption; and
means for beginning operation of the process, using the stored state of the process, after the means for selectively displaying stops operating.

29. A system as in Claim 2, wherein the content data is video data.

30. A system as in Claim 29, wherein display of the video data produces a still image.

31. A system as in Claim 29, wherein display of the video data produces a moving image.

32. A system as in Claim 2, wherein the content data is audio data.

33. A system as in Claim 2, wherein the apparatus is a computer.
